# Re-Imagine Ceilings

Linear Matrix illuminated Ceilings

“The ceiling becomes the light, the light becomes the ceiling.”

### Linear Matrix - Your Vision

You asked us to re-imagine the ceiling, so we did. Now it's a blank canvas awaiting your vision. Our revolutionary Linear Matrix illuminated ceiling is a made-to-measure panel that free's you from the constraints of conventional ceiling design – and transforms any interior into one cohesive space with beautiful homogeneous light.

### Sensory Enhancing

We deliver bright uniform glarefree LED light that eliminates shadows completely so you can see more clearly and view objects in their true light. It even enhances room acoustics by reducing disturbing sound reflections.

### Superior Homogeneous Light

Linear Matrix integrates LED lighting with Soft PVC to create a white light ceiling surface that hides the source of light completely. It delivers excellent uniform light distribution for an enhanced daylight experience. The result is a smooth and clutter-free ceiling of beautiful homogeneous light that feels as good as it looks.

### Liberating Design Possibilities

Linear Matrix illuminated ceilings opens up new minimalistic lighting design opportunities. It is literally a customizable building block for transforming any ceiling into a seamless cohesive space. For ultimate design flexibility, the ultra-thin (60mm) panel is available in made-to-measure sizes (up to 15m x 3m), and can be mounted in multiple ways (free-hanging, ceiling-mounted or recessed). There is also the option to choose the panel's edge color.

### Lighting Control

With Dimming from 1% to 100% using DALI lighting control. Linear Matrix illuminated ceilings also integrates perfectly with your building management system. Available in Single colour, Circadian Colour Temperature or Full Colour RGBW renderings.

### Simply Smarter

Linear Matrix illuminated ceilings is simple to install and easy to maintain. The ceiling panel is designed to allow easy access to the unsightly building services behind it, and has a covered backing that is both dust and insect repellent.
